

HARNESS YOUR **POWER**
STRENGTH WHERE YOU NEED IT
IMPROVE YOUR **PERFORMANCE**

GoLevita™

Brand Philosophy

“To redefine movement, recovery, and performance by creating solutions that seamlessly balance innovation, quality, and care.

We believe in a future where every individual is supported with thoughtfully crafted, performance-led, and individual-centred solutions, designed not only to enhance motion, but to protect and respect the body over time.”

The Founder's Note

GoLevita was built from firsthand experience across both performance and healthcare. With a background in high-level athletic training and ongoing immersion in the medical field, I've developed a deep understanding of how the body performs, adapts, and recovers.

Through this, I recognised a clear gap between products designed purely for performance, and those created with genuine consideration for the body over time.

GoLevita was created to bridge that gap.

Our approach brings together performance-led design and clinically informed thinking to shape solutions that not only meet the demands of athletes and active individuals, but support long-term movement, recovery, and wellbeing.

As we continue to grow, our focus is on redefining the standard, and building a future where performance and care are no longer a trade-off, but a given.

— Tamas Milassin, Founder

A person is shown from the back, performing a yoga pose (Cobra or Bhujangasana). They are wearing a black strap device with an orange sensor on their lower back. The device is labeled 'GoLevita'. The person's arms are extended forward, and their head is tilted back. The background is dark.

GoLevita

Why us?

- Australian Owned
- Local Design, Development, and Support
- Hypoallergenic Innovation
- Clinically Informed Development
- Premium Performance Materials
- Competitive Wholesale Pricing
- Fast National Distribution
- Trusted by Healthcare Professionals, clinics, and Sporting Organisations

“Every GoLevita product is developed with Australian conditions, performance, and people in mind.”

Rigid Tape

Our **Next-Generation Rigid Strapping Tape** is engineered for *high-performance hypoallergenic support* in the most demanding conditions.

We have taken time to take our design to the next level with both **Clinical and Athletic use in mind**, developing improved fabric structures and our very own adhesive that redefines possibilities by delivering reliable *stability, durability, and comfort*, setting a new standard for strapping across **Australia's toughest environments**.

Available Sizes

50mm | 38mm | 25mm | 12.5mm × 15m

Rigid Tape

Sweat-Resistant Adhesive

Maintains a strong, secure hold even in hot and high-intensity conditions.

Clean Removal

Leaves minimal residue for a more comfortable post-use experience.

Built for Australian Conditions

Engineered to perform in heat, humidity, and demanding sporting environments.

Hypoallergenic Formulation

Our special clinically formulated adhesive. Designed with skin integrity in mind, reducing the risk of skin irritation.

Reinforced Fabric Construction

Provides enhanced strength and support for joints, muscles, and ligaments.

Kinesiology Tape

Our **kinesiology tape** range is designed to support movement, recovery, and performance without restriction. Built for both clinical and active use, it delivers targeted support, flexibility, and comfort. Now available in two advanced variants to suit different environments and performance needs.

EnduraFlex™

Advanced long lasting fabric

AquaShield™

Water-resistant application

PERFORMANCE TECH

Kinesiology Tape EnduraFlex™

Built for durability, comfort, and long-lasting performance

Premium EnduraFlex™ Fabric

Engineered for enhanced strength, flexibility, and extended wear.

Enhanced Comfort

Breathable and flexible for all-day application.

Ideal For

High performance athletic use, rehabilitation, and extended wear scenarios.

Hypoallergenic Formulation

Our special formula designed to minimise skin irritation.

Sweat-Resistant Adhesive

Maintains reliable hold through training and competition.

Kinesiology Tape AquaShield™

Designed for performance in wet and high-sweat environments

Water-Resistant Formula

Reliable adhesion during swimming, recovery, and wet conditions.

Secure & Flexible Support

Moves naturally with the body.

Hypoallergenic Formulation

Our special formula designed to minimise skin irritation.

Sweat-Resistant Adhesive

Maintains reliable hold through training and competition.

Ideal For

High performance, water contact sports, and high-humidity environments.

Elastic Adhesive Bandage (EAB)

Our **elastic adhesive bandage** is engineered for optimal support, compression, and control, ideal for managing soft tissue injuries, joint instability, and post-rehabilitation care. Designed for both clinical and high-performance environments, it delivers reliable strength while maintaining comfort and flexibility.

Enables precise, consistent application

Available Size

50mm × 5.0m

UnderFix Dressing Roll

Our premium **UnderFix dressing roll** is a skin-protective dressing layer designed to enhance comfort, reduce irritation, and minimise discomfort during tape application and removal. Ideal for sensitive skin and extended use, it acts as a protective barrier while maintaining a secure, reliable hold, supporting both performance and recovery without compromising skin integrity.

Go move

Available Sizes

100mm | 50mm × 10m

UnderFix Dressing Roll

Gentle Yet Secure Hold

Reliable adhesion without aggressive pull on the skin

Hypoallergenic

Our special clinically formulated adhesive. Designed with skin integrity in mind, reducing the risk of skin irritation.

Soft, Skin-Like Fabric

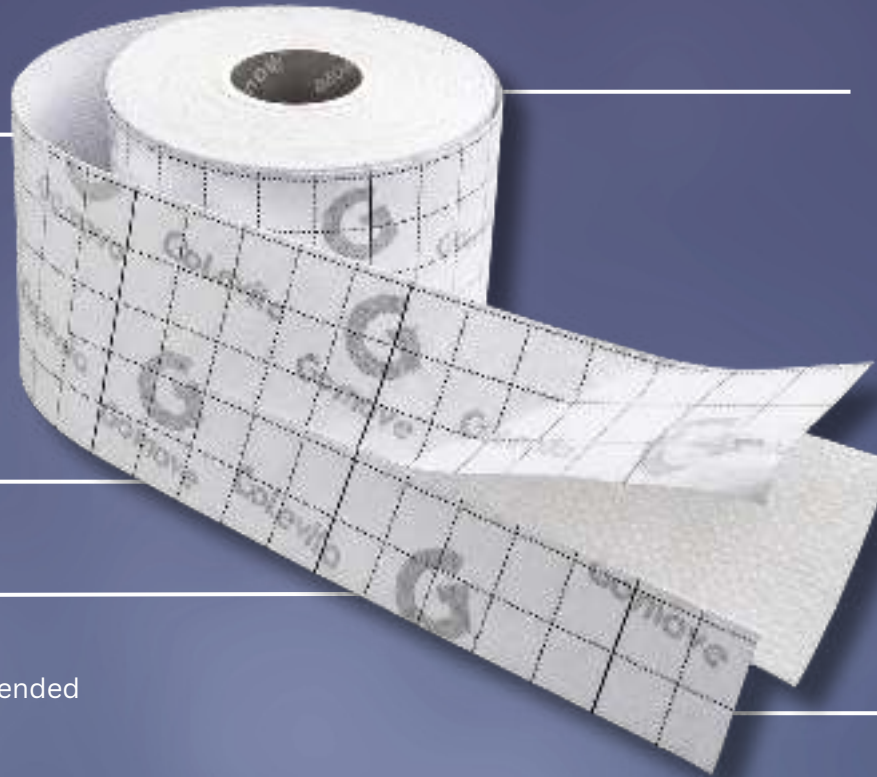

Comfortable and gentle for sensitive or irritated skin

Breathable Construction

Supports airflow for extended wear and comfort

Flexible & Easily Malleable

Conforms seamlessly to body contours

Self Adhesive Tape

Our Self Adhesive Bandage is designed to provide reliable **compression**, **support**, and **protection** without sticking to the skin or hair. Its **lightweight**, flexible, and **breathable** material conforms comfortably to the body while maintaining strong **cohesive** hold during movement and exercise. Ideal for sports strapping, **injury management**, **swelling control**, and **securing dressings**, the GoLevita Self Adhesive Bandage delivers comfortable support with easy application and removal.

Available sizes
75mm x 5m | 50mm x 5m

Foam Underwrap

Our ultrasoft **Foam Underwrap** is a **lightweight**, and **breathable protective** layer designed to improve comfort and **reduce skin irritation** beneath sports tape and adhesive bandages. Its **flexible foam** structure conforms easily to the body, helping **protect sensitive skin** while allowing smooth and comfortable tape application. Ideal for sports strapping, injury prevention, and rehabilitation, the GoLevita Foam Underwrap enhances **comfort** without compromising **performance**.

Available in two colours
70mm × 27m

Power Bands

The **Power Band** range is a high-performance training resistance loop band designed for assisted pull-ups, explosive resistance training, and full-body strength development. It helps users enhance power, agility, and flexibility while supporting effective bodyweight exercises such as pull-ups, chin-ups, and dips. Constructed from 100% premium natural latex, the band delivers excellent elasticity, durability, and consistent resistance.

We've added a **hypoallergenic, UV-resistant** coating to the formula, which extends the lifespan of the bands and allows a stretch capacity of up to 2× their original length, providing reliable support for both beginners and advanced athletes.

Power Bands

Premium Construction

Engineered for up to 2x stretch capacity without deformation

Hypoallergenic

First of its kind Hypoallergenic coating protecting you from harm

UV Guard

Advanced UV protection and protein denaturing process for extended life and durability.

Colour coded

5 colour-coded resistance options to suit various applications

Exceptional Durability

Made from 100% natural latex for superior strength and long-lasting elasticity

Power Tubes

Designed for simple, effective movement, this **resistance tube** is a portable training essential for full-body workouts anywhere. Ideal for strength training, pilates, flexibility, and rehabilitation, it delivers smooth, controlled tension without the need for bulky equipment or a gym. Lightweight and compact, it supports low-impact exercises that improve mobility, stability, and muscle activation making it suitable for all fitness levels, from recovery and beginners to advanced conditioning.

To ensure optimal performance and patient safety, we've added a **hypoallergenic, UV-resistant** coating to the formula, which extends the lifespan of the bands.

Power Tubes

UV Guard

Advanced UV protection and protein denaturing process for extended life and durability.

Inner Cord Technology

Built-in inner cord prevents the tube from overstretching or snapping

Flat Bands

The Flat Band is a versatile flat resistance band designed to support a wide range of functional training, rehabilitation, and mobility exercises. Made from 100% premium natural latex, it offers smooth, consistent tension throughout every movement, promoting muscle strength, flexibility, and joint stability.

To ensure optimal performance and patient safety, we've added a hypoallergenic, UV-resistant coating to the formula, which extends the lifespan of the bands. This band is available in three practical lengths to suit individual users, trainers, and professional facility needs.

Available Sizes
1.8m | 5m | 45.72m

Flat Bands

Premium Construction

Engineered for up to 3× stretching capacity for smooth, uniform resistance through the full range of motion

Hypoallergenic

First of its kind Hypoallergenic coating protecting you from harm

UV Guard

Advanced UV protection and protein denaturing process for extended life and durability.

Multi-Layered Latex Design

Ensures long-lasting elasticity and resistance consistency through repeated stretching

Bulk Resistance Tubes

Stock smarter. Treat better.

The **Bulk Latex Resistance Tube** is a professional-grade fitness tubing designed for manufacturing resistance systems, gym setups, and physiotherapy use. Made from 100% natural dipped latex, it provides smooth, consistent resistance and excellent elasticity for various strength and mobility exercises.

To ensure maximal performance and patient safety, we have enhanced the formula with an additional **hypoallergenic UV-resistant** coating, enhancing the lifespan of the bands. Available in **7.6 m** (25 ft) and **30.5 m** (100 ft) rolls, this tubing allows flexible cutting to any desired length for customised use.

GoLevita | **Gomove**

Bulk Flat Bands

Stock smarter. Treat better.

Our **Bulk Flat Band** is a versatile flat resistance band designed to support a wide range of functional training, rehabilitation, and mobility exercises. Made from 100% premium natural latex, it offers smooth, consistent tension throughout every movement, promoting muscle strength, flexibility, and joint stability.

To ensure maximal performance and patient safety, we have enhanced the formula with an additional **hypoallergenic UV-resistant** coating, enhancing the lifespan of the bands. This band is available in three practical lengths - **1.8 m**, **5 m**, and **45.72 m** rolls - to suit individual users, trainers, and professional facility needs.

Mini Loop Bands

A person is shown from the waist down, sitting on a gym floor. They are wearing an orange sports top and orange shorts. They are using an orange resistance band, which has the brand name 'GoLevita' printed on it, around their right foot. The band is being held by both hands, which are positioned near the knee. The background is a blurred gym environment with various exercise machines.

The **Mini Loop Band** is a compact and durable fitness band designed to strengthen and stabilize muscles through resistance training. It supports strength development, joint stability, flexibility, and mobility — making it ideal for warm-ups, rehabilitation, and functional movement exercises.

Made from **multi-layered** natural latex, the band provides consistent elasticity and can stretch up to **3x its original length** for smooth, controlled resistance during workouts. To ensure optimal performance and patient safety, we've added a **hypoallergenic, UV-resistant** coating to the formula, which extends the lifespan of the bands.

Mini Loop Bands

UV Guard

Advanced UV protection and protein denaturing process for extended life and durability.

Exceptional Durability

Made from 100% natural latex for superior strength and long-lasting elasticity

Resistance Band System

The set is a portable all-in-one workout kit designed to train the entire body anywhere, anytime.

It allows users to perform resistance-based strength, pilates, flexibility, and rehabilitation exercises without the need for heavy equipment or a gym. By combining multiple resistance tubes and adjustable straps, the system provides up to **31 levels of tension** combinations, making it suitable for all fitness levels. From rehabilitation to advanced athletic conditioning.

We use the purest form of natural latex tubing with that undergoes one of a kind protein treatment to achieve undeniable performance, reinforced by **safety inner cord** and nylon straps

To ensure optimal performance and patient safety, we've added a **hypoallergenic, UV-resistant** coating to the formula, which extends the lifespan of the bands.
